LIMITED EDITION CD ONLY (NO DIGITAL!!!) MIXED & ARRANGED BY DJ 7L OF THE BLADERUNNERS

Brick Records is proud to announce a limited number of Blacastan's *The Master Of Reality* will be available in March. The full length CD mixed by DJ 7L Of The Bladerunners was originally slated as a Japanese-only promo teaser and used as tour and show support. Brick has decided to make a few hundred copies of the mix (packaged in a retro 'paste on' style thick sleeve with obi card) available to their key accounts stateside. Only these key accounts are being offered this and there is no digital version available. Once these are gone, they're gone - this CD will NOT be repressed. This mix, full of 19 all new studio tracks features all original production from the likes of 7L (who also mixes and arranges the entire piece in his signature Bladerunner's cut and paste edit style),

Colombeyond, Esoteric, Apathy, DJ Doom, Blacastan himself and more. Vocal contributions come from Apathy, Colombeyond, Krumsnatcha and Blac's Branch Davidians crew.

This is a prelude and serves as what Blac calls "... the meal before the meal ..." referring to his upcoming full length opus entitled *Blac Sabbath*. The debut album boasts production and vocals from some of the elite in the game: Statik Selektah, Blue Sky Black Death, Mr. Green, Colombeyond, Esoteric and Celph Titled.
